

19 November 2020

Dear Parent,

New Online Careers Resource

We are really pleased to have invested in a fantastic online resource that has just been launched to our Year 12 students. Unifrog provides a broad platform where your son or daughter can access tools to get them thinking about future careers based on their personal interests and subject mix. There is information on higher education at UK and international universities, live apprenticeship vacancies plus work experience and extra-curricular opportunities to support their future plans. In addition, there is a whole host of information that young adults at their stage of life will find useful – some will be school-related around study skills and exam preparation and some will be more personal around well-being topics.

This is not a replacement for the individual and tailored careers support that we provide through our two Advice and Guidance Mentors Mrs Chipperfield and Mrs van den Berghen. This is to compliment what they are doing and allow students to do their own research and planning at a time that suits them.

We can now provide you with parent access to Unifrog so that you can also benefit from the wide range of information it offers. This can serve to help you stay informed about careers and higher education and support any conversations you may be having with your child about their plans after sixth form. Log on to www.unifrog.org/code and use the form code parents_piggott. Additionally you can watch the webinar for parents to get an overview https://www.youtube.com/watch?v=KksyelihOAw&feature=emb_logo

If you have any questions about Unifrog please direct them to Mrs Chipperfield – Chipperfield1@piggottschool.org.

Yours sincerely,

Mrs Chipperfield
